

Liquid Remediact™ Cleaning Agent

CLN352 Remediator, 1 - 5 gal. Container, 1 each

Liquid formula can be used for bioremediation on land or water to turn oily spills into carbon dioxide and water.

- Solves hydrocarbon contamination problems onsite with minimal labor and expense
- Active mixture of naturally-occurring live microorganisms and a bio-surface cleaning agent oxidizes carbons to quickly tackle contamination problems
- Microbes are in active preparation: no special solutions, no special mixing and no waiting period
- One gallon of mixed product will remediate up to 1 cubic yard of soil or 200 gallons of water
- Mixing ratio is 10 parts water to 1 part product
- Pleasant orange citrus scent

Specifications
