

## PIG® Base Encapsulating & Neutralizing Sock

PIG353 Absorbs up to 48 oz. per sock, 4 socks

Absorb, encapsulate and neutralize corrosives in one easy step for safer spill cleanup. Color indication identifies the best time to handle.

- Encapsulate and neutralize common bases; great for cleaning up spills in areas where chemicals are stored, mixed or transported
- Color changes on contact with bases, then returns to normal when neutralization is complete; helps identify the best time to handle with the least amount of risk
- Instantly absorbs up to 50% concentrations of potassium hydroxide and other strong chemical bases
- Gelling agents solidify bases during neutralization; prevents them from leaching out of sock
