

PIG® Pallet Rack Containment Sump

PAK219 Holds (4) 55 gal. Plastic or Steel Drums or (1) IBC, 66 gal. Sump Capacity

Economical polyethylene sump drops right into your existing rack system to add secondary containment for stored drums.

- Holds almost any wood, poly or metal pallet above sump without expensive grating; strong enough to support four fully loaded drums or even a single IBC
- Sump catches leaks, drips and spills to help you comply with regulations and keep your storage areas clean and safe; allows vertical segregation of incompatible materials to save floor space
- Low-density polyethylene (LDPE) construction resists UV rays, rust, corrosion and most chemicals
- Drops right into steel pallet racks from 36" to 48" deep; no special installation, hardware or grating required
- Low-profile lip doesn't block forklift access to pallet
- Nestable design permits stacking when not in use to save space; lowers cost of bulk shipping
- Increase sump capacity by connecting additional units using bulkhead fittings (sold separately)
