

PIG® Water-Activated Flood Barrier

WTR011 Ideal For Ongoing Protection at Doorways, Entrances, 6.5" W x 5' L x 3.5" H When Fully Saturated, 4 each

Swells on contact with water to become a super absorbent, long barrier that covers lots of ground for quick, easy protection from floodwater.

- Place 5'-long sandbag replacement in front of a single-door entrance to prevent floodwaters from entering; lay end to end for more protection
- Lightweight, compact and easy to handle before activated, unlike standard sandbags which are heavy, messy and labor-intensive
- Built-in wedge design helps prevent barriers from rolling out of place
- NOTE: Not for use with salt water
