### Introduction

### **PIG Waste Compactor**

Waste disposal is one of the most challenging issues industries face today. The average disposal cost for a 55-gallon drum can range from \$200–\$700. Further complicating the disposal picture is the shrinking number of active landfills. As a result, companies are pursuing innovative ways to reduce their disposal costs.

In 1994, New Pig developed the PIG Waste Compactor to compact absorbents and other soft wastes. The Compactor significantly reduced waste to a fraction of its original volume resulting in dramatically lower disposal costs. The original pump kit captures segregated liquids for reuse or recycling.

To determine just how much money a PIG Waste Compactor could save you, we conducted a research study. Our results found that 100% of users significantly reduced the number of drums they sent out for disposal. Compaction ratios ranged from a high of 6:1 to a low of 2:1.

New Pig's Product Development Team has designed the following features to ensure safe operation: an improved ram guard completely encloses the top of the drum, and the drum doors interlock to prevent access during operation.

DISCLAIMER: Wringing or compacting waste may be considered "treatment" by RCRA regulations. You may require a permit to use this product. Please consult with your state EPA waste management office prior to use.

#### **Use your PIG Waste Compactor to crush:**

- Absorbents
- Rags
- Plastic
- Paper
- Cardboard
- Paper filters
- Other soft materials

(not recommended for wood, metal or other hard materials)

### **Section I**

### **Electric Compactors**

### 1 Setup Instructions

- 1. Remove PIG Waste Compactor from pallet and place on floor.
- 2. If desired, permanently mount the compactor to the floor using the predrilled holes in the base. Up to ½" floor anchors can be used. Floor anchoring not required for operation (anchors not included).
- 3. Power source required: 120 Volt AC with 15 amp breaker.
- 4. Wire unit to terminal block inside closure through hole marked 120 Volt AC 15 amp as shown in schematic. (Note: Wiring should be performed by a qualified electrician.)

### **2 Operating Instructions**

Always wear the proper safety equipment when operating this unit.

1. Open safety cover.

2. Tilt unit back with drum in place to facilitate loading.

3. Return to upright locked position and close safety cover.

 Move directional lever on electric pump to the down position and depress operation button to compact. Continue to compact until the pump stops (reaching maximum pressure).

5. To raise the ram, release button to stop, move directional lever on electric pump to the up position and depress operation button.

Note: Compactor will not operate if the unit is not in the upright position or safety cover is not closed.

# PIG Electric Compactor Item# DRM652/7848

#### **DESCRIPTION**

An electric operated compaction device used to increase the amount of waste that can fit into a disposal drum.

Packaging: 1 Box/Pallet
Color: Black/Yellow
Weight: 506 lbs.
# Per Pallet: 1
Dimensions:

Overall Dimensions — 67 1/8" H x 311/2" W x 38" D

Ram Diameter — 22" O.D. Hand Remote — Cord Length: 6'

Composition: Hot rolled steel, structural c-channel and aluminum

Power Supply: 120 Vac

Amp Draw: 10 amps under maximum load

Motor: 1/2 HP - 3450 RPM

Elec. Connection: Power supply connection to be provided by customer

Average Cycle Time: 1 Minute

#### FEATURES/BENEFITS

- Ram Guard Covers top of drum/prevents any possible hand injuries. Microswitch prevents use of compactor until cover is shut.
- 120 VAC/10 AMP hydraulic pump Easy power supply is readily available.
- 12,000 lbs. of downward compaction force High compaction capacity.
- Compacts as many as 6 drums into 1 Reduces waste stream and disposal costs.
- One minute cycle time Compacts quickly and saves time.
- Hand Remote Control Easy operation.
- Tilt-back frame Allows drum to be filled with materials without having to move drum away from compactor.
- Safety interlock Won't run unless the unit is in the locked upright position.
- Automatic shutoff Unit will only run when the button is depressed.
- Raised steel base plate under drum Prevents the bottom of the drum from bowing under the pressure of compaction.
- View port on ram guard Allows the user to safely view what is happening in the drum without opening the lid.
- Mounting holes in the base plate Allows permanent mounting to floor.
- Drain holes in the ram plate Allows liquid collected on the top of the ram plate to drain back into the drum when the plate
  is lifted.

#### **APPLICATIONS**

The PIG Waste Compactor is designed to assist in waste minimization programs by allowing the user to fit more soft waste (absorbents, rags, paper filters and trash) in each disposal drum. Designed to compact.

\* The unit should NOT be used to crush metal, steel drums, wood, other hard materials or flammables.

# PIG Electric Compactor with Waste Pump Item# DRM653/7849

#### **DESCRIPTION**

An electric operated compaction device used to increase the amount of waste that can fit into a disposal drum. Includes a waste pump that allows removal of free-standing liquids from the compaction process.

Packaging: 1 Box/Pallet Color: Black/Yellow Weight: 524 lbs. # Per Pallet: 1 Dimensions:

Overall Dimensions — 67 1/8" H x 31 1/2" W x 38" D

Ram Diameter — 22" O.D. Hand Remote — Cord Length: 6'

Waste Pump Hoses — Intake/Outlet: 5/8" I.D. x 7'

Composition: Hot rolled steel, aluminum and structural C-Channel

Power Supply: 120 Vac

Amp Draw: 10 amps under maximum load

Motor: 1/2 HP - 3450 RPM

Elec. Connection: Power supply connection to be provided by customer

Average Cycle Time: 1 Minute

#### **FEATURES/BENEFITS**

- Ram Guard Covers top of drum/prevents any possible hand injuries. Microswitch prevents use of compactor until cover is shut.
- 120 VAC/10 AMP hydraulic pump Easy power supply is readily available.
- 12,000 lbs. of downward compaction force High compaction capacity.
- Self-priming 3 to 4 gal/min. diaphragm waste pump High output pump that can run dry without damage.
- 20 mesh easy clean filter system Keeps large particles from damaging and clogging pump.
- Corrosion- and chemical-resistant No metal parts come in contact with liquids being pumped.
- Tilt-back frame Allows drum to be filled with materials without having to move drum away from compactor.
- Safety interlock Won't run unless the unit is in the locked upright position.
- One minute cycle time Compacts quickly and saves time.
- Compacts as many as 6 drums into 1 Reduces waste stream and disposal costs.
- Hand Remote Control Easy operation.
- Automatic shutoff Unit will only run when the button is depressed.
- Drain holes in the ram plate Allows liquid collected on the top of the ram plate to drain back into the drum when the plate is lifted.
- Raised steel base plate under drum Prevents the bottom of the drum from bowing under the pressure of compaction.
- Mounting holes in the base plate Allows permanent mounting to floor.
- View port on ram guard Allows the user to safely view what is happening in the drum without opening the lid.

#### **APPLICATIONS**

The PIG Waste Compactor is designed to assist in waste minimization programs by allowing the user to fit more soft waste (absorbents, rags, paper filters and trash) in each disposal drum. Designed to compact.

\* The unit should NOT be used to crush metal, steel drums, wood, other hard materials or flammables.

#### 8 Preventive Maintenance

- 1. Check hydraulic oil level. Should be within approximately 1" from top of filler hole. Use a general-purpose mediumweight hydraulic fluid.
- 2. Check for loose nuts, bolts and pins.
- 3. Check ram plate to ensure that it is secured to the hydraulic cylinder shaft. Run unit empty to full extension of the hydraulic cylinder. Allow the unit to build full pressure, this will lock the cylinder in place so that it can be tightened or removed. Caution Loosen set screw before attempting to tighten or remove ram plate. Tighten set screw after adjusting.

### 9 Troubleshooting Guide

#### Hydraulic pump runs, but ram will not move.

- Hydraulic fluid is low Use a mediumweight hydraulic fluid and fill to within 1" of the top of filler hole with the ram
  in the up position.
- Up and down lever is not fully engaged Make sure lever is moved completely to the up or down position.
- Breather cap on the hydraulic pump is closed Open cap.

#### Waste pump runs, but will not pump.

- Check hoses for obstructions.
- Check filter screen and clean.

#### Hydraulic pump will not run.

- Safety cover micro is not fully engaged Make sure it is fully closed.
- Safety cover micro is out of alignment Adjust micro so it is fully engaged when cover is in the closed position.
- Tilt micro is not fully engaged Make sure the compactor is in the upright position and the locking pins are fully extended and depressing the micro.
- Tilt micro is out of alignment Adjust micro so it is fully depressed when compactor is in the upright position and the locking pins are fully extended.
- · Check power supply to the unit.

#### **Loose Ram Plate**

• Ram plate is loose — Run the compactor empty to full extension of hydraulic cylinder. Allow unit to build full pressure, this will lock the cylinder in place so it can be tightened or removed.

**CAUTION:** Loosen set screw before attempting to tighten or remove ram plate.

### Section II

### **Air Compactors**

### 1 Setup Instructions

- 1. Remove PIG Waste Compactor from pallet and place on floor.
- 2. If desired, permanently mount the compactor to the floor using the predrilled holes in the base. Up to ½" floor anchors can be used. Floor anchoring not required for operation (anchors not included).
- 3. Remove the yellow plug in the top of the air pump with wrench. Replace with the attached black vent cap. Do not over-tighten the vent cap with wrench.
- 4. Remove the pipe plug from the air intake pipe located on the back of the unit, attached to the side of the Rear Pivot (Part #19 on exploded view).
- 5. Screw a male air connect chuck into the 3/8" pipe.
- 6. Attach air chuck and air line (both not included) to male air connect.
- 7. Ground unit to earth ground with provided grounding wire. **Note:** A ground is provided with DRM654 and DRM655.

Note: An in-line air filter (included) and oiler (not included) should be used with this unit.

### 2 Operating Instructions

Always wear the proper safety equipment when operating this unit.

1. Open safety cover.

2. Tilt unit back with drum in place to facilitate loading.

3. Return to upright locked position and close safety cover.

 Move directional lever on air hydraulic pump to the down position and depress operation button to compact. Continue to compact until the pump stops (reaching maximum pressure).

To raise the ram, release button to stop, move directional lever on air hydraulic pump to the up position and depress operation button.

Note: Compactor will not operate if the unit is not in the upright position or safety cover is not closed.

# PIG Electric Compactor Item# DRM654/7850

#### **DESCRIPTION**

An air-driven hydraulic compaction device used to increase the amount of waste that can fit into a disposal drum.

Packaging: 1 Box/Pallet
Color: Black/Yellow
Weight: 506 lbs.
# Per Pallet: 1
Dimensions:

Overall Dimensions — 67\%" H x 31\%" W x 38" D

Ram Diameter — 22 " O.D.

Composition: Hot rolled steel, structural c-channel and aluminum

Minimum Air Required: 80 psi, 10 cfm air

Average Cycle Time\*: 2 minutes (1 minute up, 1 minute down)

\* May vary according to air pressure.

#### FEATURES/BENEFITS

- Compacts as many as 6 drums into 1 Reduces waste stream and disposal costs.
- Air-driven hydraulic pump (preset at 2,500 psi) Provides 12,000 lbs. of downward force.
- Ram Guard Covers top of drum/prevents any possible hand injuries. Microswitch prevents use of compactor until cover is shut.
- Manually operated on/off air valve Unit will not operate unless the valve is depressed. When valve is released, compactor shuts off.
- Tilt-back frame Allows drum to be filled with materials without having to move drum away from compactor.
- Safety interlock Won't run unless the unit is in the locked upright position.
- Raised steel base plate under drum Prevents the bottom of the drum from bowing under the pressure of compaction.
- View port on ram guard Allows the user to safely view what is happening in the drum without opening the lid.
- Mounting holes in the base plate Allows permanent mounting to floor.
- Drain holes in the ram plate Allows liquid collected on the top of the ram plate to drain back into the drum when the plate is lifted.
- Retaining pin Keeps drum located and secure underneath ram.
- Includes air line filter Removes water from air line and extends life of pump.
- Waste pump available (DRM345) Allows liquids to be pumped from waste drum.

#### **APPLICATIONS**

The PIG Waste Compactor is designed to assist in waste minimization programs by allowing the user to fit more soft waste (absorbents, rags, paper filters and trash) in each disposal drum. Designed to compact.

\* The unit should NOT be used to crush metal, steel drums, wood, other hard materials or flammables.

# PIG Spark-Resistant Compactor Item# DRM655/7851

#### **DESCRIPTION**

An air-operated, spark-resistant compaction device used to reduce waste to a fraction of its original volume.

Packaging: 1 Box/Pallet

Color: Black/Silver Weight: 486 lbs. # Per Pallet: 1 Dimensions:

Overall Dimensions — 31½" W x 67½" H x 38" D

Composition:

Aluminum: Ram, Base, Retaining Pin, Ram Guard, Surround Shield

Frame: Hot Rolled Steel

Minimum Air Required: 80 psi, 10 cfm Air

Average Cycle Time\*: 2 minutes (1 minute down, 1 minute up)

\* May vary according to air pressure

#### **FEATURES/BENEFITS**

- All components that a drum may come in contact with are made of aluminum with air-driven hydraulics Spark-resistant.
- Compacts up to 6 to 1 (depending on material) Reduces disposal costs by having fewer drums to dispose of.
- Use with absorbents, rags, paper, or anything that is "soft" rather than "hard" and non-metallic Minimizes waste.
- Air-driven hydraulic pump (preset at 2,500 psi) Provides 12,000 lbs. of downward force.
- Ram Guard Covers the top of drum/prevents any possible hand injuries. Microswitch prevents use of compactor until cover is shut.
- Safety interlock Compactor will not run unless frame is locked into the upright position.
- Manually operated on/off air valve Unit will not operate unless the valve is depressed. When valve is released, compactor shuts off.
- Tilt-back frame Allows drum to be filled with materials without having to move drum away from compactor.
- Raised aluminum base plate Centers the drum under the ram, plus it prevents the bottom of the drum from bowing under compaction force.
- View port on ram guard Allows the user to view compacting ram and any liquids that may accumulate.
- Holes drilled in base plate Allows unit to be mounted to floor. Floor anchoring is not required.
- Drain holes in ram plate Allows liquids to rise to the top when compacting.
- Retaining pin Keeps drum located and secure underneath ram.
- Compactor includes an attached grounding wire Allows user to ground unit for added safety.
- Includes air line filter Removes water from air line and extends the life of the pump.

#### **APPLICATIONS**

To assist in waste minimization, the PIG Waste Compactor allows the user to fit more soft waste in each disposal drum.

\*\*IMPORTANT: It is the user's responsibility to ensure waste entered into drum will not generate a spark by itself, or by coming in contact with the drum.

# PIG Spark-Resistant Compactor with Waste Pump Item# DRM655/7851

#### **DESCRIPTION**

An air-operated, spark-resistant compaction device used to reduce waste to a fraction of its original volume.

Packaging: 1 Box/Pallet Color: Black/Silver Weight: 524 lbs. # Per Pallet: 1 Dimensions:

Overall — 31½" W x 67½" H x 38" D

Composition:

Compactor: See DRM655. PUMP: Wand; Aluminum, Hose; Static Dissipative. Wetted Pump Parts: Polypropylene, SS and Teflon

Minimum Air Required: 80 psi, 10 cfm Air

Average Cycle Time\*: 2 minutes (1 minute down and 1 minute up)

\* May vary according to air pressure Pump Wetted Parts: SS-Filled Acetal

Center Body: Polypropylene Check Valve: Stainless Steel Diaphragm O-Ring: Teflon

Pump Output: 13 GPM (self priming)

#### **FEATURES/BENEFITS**

- All components that a drum may come in contact with are made of aluminum with air-driven hydraulics Spark-resistant.
- Compacts up to 6 to 1 (depending on material) Reduces disposal costs by having fewer drums to dispose of.
- Use with absorbents, rags, paper, or anything that is "soft" rather than "hard" and non-metallic Minimizes waste.
- Air-driven hydraulic pump (preset at 2,500 psi) Provides 12,000 lbs. of downward force.
- Ram guard Covers the top of drum/prevents any possible hand injuries. Microswitch prevents use of compactor until cover is shut.
- Safety interlock Compactor will not run unless frame is locked into the upright position.
- Manually operated on/off air valve Unit will not operate unless the valve is depressed. When valve is released compactor shuts off.
- Tilt-back frame Allows drum to be filled with materials without having to move drum away from compactor.
- Raised aluminum base plate Centers the drum under the ram, plus it prevents the bottom of the drum from bowing under compaction force.
- View port on ram guard Allows the user to view compacting ram and any liquids that may accumulate.
- Holes drilled in base plate Allows unit to be mounted to floor. Floor anchoring is not required.
- Drain holes in ram plate Allows liquids to rise to the top when compacting.
- Retaining pin Keeps drum located and secure underneath ram.
- Compactor includes an attached grounding wire Allows user to ground unit for added safety.
- Includes air line filter Removes water from air line and extends the life of the pump.
- Factory-installed non-metallic groundable diaphragm pump-out kit Static buildup bleed-off, provides superior compatibility with harsh industrial solvents and other volatile materials.

#### **APPLICATIONS**

To assist in waste minimization, the PIG Waste Compactor allows the user to fit more soft waste in each disposal drum.

\*\*IMPORTANT: It is the user's responsibility to ensure waste entered into drum will not generate a spark by itself, or by coming in contact with the drum.

### **6** Air Schematics

#### Item# DRM654 and DRM655

#### Item# DRM656

#### 7 Preventive Maintenance

- Clean Bowl Filter Keep air dry
- 2. Add a small amount of air tool oil or lightweight machine oil to air line.

  Note: An automatic oiler may be added to the air line on the unit, but do not over-oil.
- 3. Check hydraulic oil level. Should be within approximately 1" from top of filler hole. Use a general-purpose mediumweight hydraulic fluid.
- 4. Check for loose nuts, bolts and pins.
- Check Ram Plate to ensure that it is secured to the hydraulic cylinder shaft. Run unit empty to full extension of the hydraulic cylinder.
   Allow the unit to build full pressure, this will lock the cylinder in place so that it can be tightened or removed. Caution Loosen set screw before attempting to tighten or remove ram plate.

### 8 Troubleshooting Guide

#### Hydraulic pump runs, but ram will not move.

- Low air pressure Air pressure should be between 80 psi and 120 psi.
- Hydraulic fluid is low Use a mediumweight hydraulic fluid and fill to within 1" of the top of filler hole with the ram in the up position.
- Water and dirt in the air supply Drain water and clean filter bowl. Add a small amount of air tool oil or lightweight machine oil to the air line.
- Up and down lever is not fully engaged Make sure lever is moved completely to the up or down position.
- Breather cap on the hydraulic pump is closed Open cap.

#### Waste pump runs, but will not pump.

- · Check hoses for obstructions.
- Check filter screen and clean.

#### Pump will not run.

- · Check air supply.
- Add a small amount of air tool oil or lightweight machine oil to the air line.

#### Hydraulic pump will not run.

- Check air supply Air pressure to unit should be between 80 psi and 120 psi.
- Water and dirt in the air supply Drain water and clean filter bowl. Add a small amount of air tool oil or lightweight machine oil to the air line.
- Safety cover micro is not fully engaged Make sure it is fully closed.
- Safety cover micro is out of alignment Adjust micro so it is fully engaged when cover is in the closed position.
- Tilt micro is not fully engaged Make sure the compactor is in the upright position and the locking pins are fully extended and depressing the micro.
- Tilt micro is out of alignment Adjust micro so it is fully depressed when compactor is in the upright position and the locking pins are fully extended.

#### **Loose Ram Plate**

• Ram plate is loose — Run the compactor empty to full extension of hydraulic cylinder. Allow unit to build full pressure, this will lock the cylinder in place so it can be tightened or removed.

**CAUTION:** Loosen set screw before attempting to tighten or remove ram plate.

### **Section IV**

### **Limited Warranty**

Congratulations on your recent purchase of a quality New Pig Corporation product. We are confident that our product will perform well and are pleased to provide you (the Original Retail Purchaser) with this Limited Warranty valid for one year from the original purchase date. Remember to keep proof of your purchase date.

FOR SERVICE OR OUESTIONS CALL 1-800-HOT-HOGS®

#### LIMITED WARRANTY

New Pig Corporation warrants to the Original Retail Purchaser that the enumerated products are free from mechanical or electrical defects in materials and workmanship. This LIMITED WARRANTY is only valid if the Original Retail Purchaser notifies New Pig Corporation within one (1) year (the "Warranty Period") of the original retail purchase. This LIMITED WARRANTY only applies to the following enumerated products. New Pig Corporation shall, at its sole discretion, repair the product or replace it with a product of comparable value. New Pig Corporation may require the Original Retail Purchaser to return the product to New Pig Corporation at the Original Retail Purchaser's expense. For notification or questions, call 1-800-HOT-HOGS®. You may also write Customer Service, ATTN: Warranty Service, New Pig Corporation, One Pork Avenue, Tipton, PA 16684-0304. You must maintain proof of purchase of the product to prove the date of purchase.

THIS LIMITED WARRANTY DOES NOT COVER NORMAL WEAR AND TEAR, DAMAGE RESULTING FROM NEGLIGENT USE, DAMAGE FROM MISUSE OF THE PRODUCT, USE OF IMPROPER CURRENT OR VOLTAGE, ANY USE NOT IN ACCORDANCE WITH THE OPERATION MANUAL, GLASS BREAKAGE (IF APPLICABLE), DISASSEMBLY, REPAIR OR ALTERATION BY ANY PERSON NOT SPECIFICALLY AUTHORIZED BY NEW PIG CORPORATION.

THE REMEDIES PROVIDED IN THIS LIMITED WARRANTY ARE THE SOLE AND EXCLUSIVE REMEDIES AVAILABLE TO YOU. NO OTHER EXPRESS WARRANTIES ARE MADE. ALL IMPLIED WARRANTIES, INCLUDING BUT NOT LIMITED TO ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OF USE, ARE EXCLUDED. IN NO EVENT SHALL NEW PIG CORPORATION BE LIABLE FOR ANY INCIDENTAL OR CONSEQUENTIAL DAMAGES. IN NO EVENT SHALL NEW PIG CORPORATION'S LIABILITY EXCEED THE ORIGINAL PURCHASE PRICE OF THE PRODUCT WHICH IS THE SUBJECT OF PROPER NOTICE OF DEFECTS. IF THE ORIGINAL RETAIL PURCHASER FAILS TO NOTIFY THE NEW PIG CORPORATION OF ANY DEFECTS, WHETHER PATENT OR LATENT, WITHIN THE WARRANTY PERIOD, NEW PIG CORPORATION SHALL HAVE NO FURTHER LIABILITY OR OBLIGATION.

SOME STATES AND PROVINCES DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS OR DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATIONS MAY NOT APPLY TO YOU.
